What Others Say

PCGAMER
"Offering mid-world performance data in a great idea, and makes the process of ordering a PC much less abstract for newcomers."

KOTAKU
"There's something lovely about having a PC that comes with a set of suggestions for frames-per-second targets for the games I planned."

techradar.
"This is certainly a very neat idea, and the company is putting its money where its mouth is regarding the frame-rate estimations."
